My other favorite band at the moment is Tool. I don't listen to many bands. You guys know a lot more about music than I do. ;)

No. This website run off Joomla, SMF and many plug-ins and components. Basically, I download a lot of features and modify them to suit the needs of the site. It can be hard sometimes because I have little experience in coding. I am not a professional web designer, but I manage. The design is based off a template which is heavily modified. You can see the original template [Here](#).

My other favorite band at the moment is Tool.

Mine too.

Have you seen this interview where Danny Carey rips on Billy Corgan?? I mean, I love Tool but they can be some arrogant ass holes.
