This is a good place. It's run by Frank Quinto who has connections with the band, so it's as close as an official live recording site as we're going to get.

Hey, cool! The Shepards's Bush concert was obviously recorded away from the audience. Pretty good quality, no annoying whistling and clapping louder than the actual band! Amazing!

Songs suchs as '?', 'Mama', 'In My Body' are all new and created for the shows only or can we expect studio versions?
