Does anyone have any mp3's of the new Stockholm show? They played Stellar and Superchrist again and just wanted to check it out.

They didn't play Steller. It was on the setlist but at the last minute it was replaced with Starla, don't know why.

I don't think this show has surfaced. As always your best bet is to check archive.org and the zomb for new boots.

Anyone have mp3's of this show? Also what's the source for this show, I hear its quite a good recording.

BTW. This archive link is not working for me :upset

side note...

I just bought a MacBook, and I'm still in the learning process and need a good FLAC converter for the mac. Any suggestions?
