hahaha suck shit!! really your friends didnt say how bad itd be if u took that many??? i take speed sometimes to keep me awake at work which is a recent thing but ive never really taken drugs for recreation, and i only take a bit, the first time u do lots is always tragic but now i cant justify coming down unless ive made some cash. unless its coke, which is expensive even for the mediocre shit. u fuckin tool lol (KNOW BETTER NXT TIME) and u know that if u do shit fo long enough you can at worst gain a nice case of psychosis OR just become perpetually depressed. not nice. drugs are bad Mmkay? :jamescry i bet u feel like james does right now?

Even five sounds crazy to me. I did 1/2 of one once and it was one of the worst experiences of my life. *shudder*

Go easy on yourself, dude!

I am laughing out loud. what was so bad about it? why would you only take half? thats like taking half a tylenol, its not gonna do anything.

Despite it coming from a friend, I think our dosages were laced with something else because I got very sick and by the end of the night, felt like my brain was swallowing itself. Maybe it's because I'm a skinny girl it affected me different but yeah, I have no intentions of doing THAT again.

Shrooms on the other hand, haha
