I don't have the final Metro show on my computer. It's going to take a while to get them on the site, unless someone wants to upload it somewhere.

What's the best way to download multiple mp3's off the same web page? Is one by one the only way?

Quality is not as bad as I remembered. I haven't listened to this show in a while.  
I'm working on uploading it right now. It will take a while though. My version was lossless, but I had to convert it to mp3 for space reasons.

Not quite because it's not actually the last Pumpkins show.

Murder, where did the artwork come from, and why not add the dvd audio of Fuck You?

What's the best way to download multiple mp3's off the same web page? Is one by one the only way?

Lets see.....The way I do it on this site is to use the Firefox browser found HERE <http://www.mozilla.com/en-US/>

AND

Download them All add on for Firefox found here

<http://www.downthemall.net/>

Basically it takes all the links on the page you are viewing and lets you pick the ones you want to download and to what folder.

It works pretty good, but could use some improvement....anyways thats what I use but I bet theres a better way somewhere
