## aliens

Posted by doomsdayclock - 2008/04/08 19:23

---

so i was watching this video on youtube and i'll post the link below (yea it's an hour and a half long but i split it up over time) anyone else believe that they're out their? I'm a Christian and believe in God but I believe the Universe is too big not to have other beings in it. Maybe God is above all beings in the Universe and the Bible was meant just for us while there's other Bible's for other planets...

I believe without a doubt that there is at least one other decently advanced civilization somewhere in the universe. It's just improbable to say there isn't. It's the god thing I have trouble believing in, but to those who haven't lost their faith, well then soldier on.

I think they're probably out there but I don't think they have ever came to earth most "alien abductions" are really from sleep paralysis or however you spell it.

sleep paralysis is terrrrible

I can see why people make stories about abductions and what not

it's pretty terrifying

Bibles on other planets?

Dude, we half half a gazillion religions on our own planet.

I'd bet that if there were aliens out there, they would hae another half gazillion religions too, and not just the one bible.

I think it's easier to believe that we're not the only intelligent race in the universe. Out of the entire universe there has to be other advanced lifeforms.  
As for them visiting Earth, I have an open mind to that idea but at the same time I think there are a lot of made up stories and people trying to get attention, or just people seeing things that aren't really there.

And coming up with conspiracy theories, to explain those "BUT WHAT ABOUT..." kind of situations.

Yeah, it's a creepy thought.

One time I had something like sleep paralysis. It wasn't the actual thing of course cause it's only happened once and I didn't see anything crazy. But I remeber being half asleep in my bed. I wasn't able to move and I was really scared and sweaty. It was terrible
