
The Mercury Tree (Piano)

Does anyone have any idea where this surfaced from? Is it from a demo tape somewhere? I got it from Ozphoria last year, but then they took it off...

Either way, enjoy!

It's from another unsurfaced MACHINA-Demotape as far as I know...but don't ask me where Ozphoria got it from for its "Ultra Rare Trax" Compilation. (I also downloaded them last year and wonder why they removed it).

It came from Billy's Myspace page when TheFutureEmbrace came out.

Ah, thank you Murder! That makes since, and I've only been waiting for Billy to update his MySpace pages with new music.

:D

Cool song, thanks!

ApathysEcstasy's new avatar pic is so funny, esp. w/ the floating heads.
