## How do I get a DVD on to my computer?

Posted by superchrist - 2008/05/22 13:34

---

I know this is a really dumb question, but I have never done it before. I wanna put a couple of my movies on my computer and then convert them so I can put them on my iPod. I have Windows Vista if that helps out the question. Can anyone help? :confused

You can use DVD Decrypter to rip VOB files from your DVDs. <http://www.doom9.org/software.htm> and then use VirtualDub-MPEG2 to convert them to AVI. <http://es.geocities.com/dextstuff/>
