JAPANESE WATER POWERED CAR!!

I know you're asking yourself why is the world fighting over oil and power when its on you're doorstep, Why didn't the news channels report this instead of investing money into a war that is not meant to be won its just something is wrong maybe I'm silly or this space we call the web can become something more.

But I have a believe that as a people we can save live and make a better future, Let us come together and diverse an idea that can positively effect our responsibly it begins now.

This is subject many running away from but real champions are running too!

The world is like a ride in an amusement park. And when you choose to go on it, you think it's real because that's how powerful our minds are. And the ride goes up and down and round and round. It has thrills and chills and it's very brightly coloured and it's very loud and it's fun, for a while. Some people have been on the ride for a long time and they begin to question, is this real, or is this just a ride? And other people have remembered, and they come back to us, they say, "hey - don't worry, don't be afraid, ever, because, this is just a ride..." ...It's just a ride. And we can change it anytime we want. It's only a choice. No effort, no work, no job, no savings and money. A choice, right now, between fear and love. The eyes of fear want you to put bigger locks on your doors, buy guns, close yourself off. The eyes of love, instead, see all of us as one. Here's what we can do to change the world, right now, to a better ride. Take all that money that we spend on weapons and defenses each year and instead spend it feeding and clothing and educating the poor of the world, which it would many times over, not one human being excluded, and we could explore space, together, both inner and outer, forever, in peace.

Bill Hicks

Absolutely amazing! Though, I cannot say that this is something that hasn't been thought of, or that we as humans couldn't have done a long time ago. I really hope it gets streamlined in Japan. Perhaps that will be more incentive for USian companies to produce similar cars, and not just buying up the patents so the designs go extinct!

Until then I will continue to ride my bicycle everywhere I go!

using hydrogen fuel cells is the energy of the future. the problem with implenting it into american society is that it will cost a tremendous amount of money and put our country into a greater national debt. the good news is that America never has a deadline to pay backs its debt so I would guess we will start seeing hydrogen fueled cars over the next ten years.

well, we need to do something. i was thinking of putting a desiel motor in my car so that i can make my own biodiesel. but i will probably end up just buying a small compact that gets 50 miles to the gallon, if i can find one.

but my husband and his friend have been looking online and found several sites that give instructions on how to make your car run on water, and that is without changing to many of the parts that are already in the car. they have about got it all figured out, and will be trying it very soon. if all goes well i will post it here, hopefully along with video of the car running on water.

This is awesome! A friend of mine was talking about this today and said that a contract has been worked out and that there are plans for a factory to be built here in the US by 2012. He said that the price of the car would start at \$17,000. I'm not sure how accurate this is but he loves this sort of thing and does research up the ying yang.

I can't wait to see if it comes to fruition.

okay, back to my last post on saying we'd see water powered cars over the next ten years. Well it came earlier than i expected. I saw one at the gym yesterday and they are extremely awesome. (and quite small for that matter) If they got in a crash with a navigator, it wouldn't be pretty.

This subject is not just about water powered cars its about power of freedom of speech and its you're right, we have to do something about it.

I'm try to bring people together, but if its not you thats going to come and do something don't think someone els is.

Net Neutrality

Sexiest use for Water ever!
