- 9) Cherub Rock

Encore 1:

- 10) Untitled

Encore 2:

- 11) Banter
- 12) No Surrender
- 13) Gossamer

Notes

This was the 1st show @ the Fillmore that was pro shot. so we might see some of these songs later. Billy was in a very good mood on this Friday night. a lot of short banter. The last banter was the only one long enough that i felt could use its own chapter. I have some wonders about the audio sync being perfect during Drown - 1979. It feels like it goes in & out of sync. some people don't notice it, the rest of the show feels like it is in sync perfectly.

Highlights: This show was pretty smooth. lots of guitar changes. Nice 1979 full band. Last performance of Daydream & The Crying Tree of Mercury @ the Fillmore. lots of panning in this footage to see a lot of the band

A HD 1080i BLU-RAY version currently not available for public circulation but does exist. (I am looking for Asheville shows in HD to trade for)

Hey, I just downloaded the first disc, but it's all in VOB files, and I don't even know what that is. Does anyone know how I can play it through Windows Media Player? If not, I would love it if someone could somehow convert those files into something that my computer can play.

Thank you to anyone that can help me. :)

why don't you just burn it to a DVD?

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by zerohero84 - 2008/07/01 14:52

Does that mean I will only be able to play the DVD through that player?

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by Murder McMurderson - 2008/07/01 15:01

There are probably some other players that could play it, but VLC is the best. Or you could burn it to a DVD like Monte suggested. Is there any particular reason you need it on Windows Media Player?

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by zerohero84 - 2008/07/01 15:04

There is no great reason, it's just my preference. So that doesn't matter too much. I'm quite unfamiliar with VOB files, and I was just unsure if they are easy to burn onto a DVD and if it would play well.

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by Murder McMurderson - 2008/07/01 15:12

Actually try this: Change the .vob at the end of the filename to .mpeg then see if it'll play in Windows Media Player. If you don't see .vob at the end of the filename, you may need to uncheck "Hide extensions for known file types" in your folder options.

Posted by Geek N.Z. - 2008/07/02 00:20

Could someone (someone? what about sometwo or somethree?) try these different ways, so I can make a judgement on how I should view it (if)/when I download it?

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by epitome - 2008/07/03 09:36

Well I finally got round to downloading it (still downloading the second disc actually). To play it I just extracted the .iso file from the .rar files, "mounted" it using PowerISO (makes Windows think it is a DVD in a DVD drive) then played it through Media Player. Probably the easiest way to do it without burning it to DVD.

=====

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by epitome - 2008/07/03 15:04

I've now converted the DVD (disc 1) to a Divx AVI file. It comes out at about 1.2GB rather than 4GB. I'd say it loses just a very slight bit of picture quality, but I did have it adjust the volume during the conversion, so the audio is better.

Now I can't decide whether to just keep the AVI or burn the ISO to DVD! :)

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by epitome - 2008/07/03 21:00

So I just watched the first 'DVD'. Awesome performance and good quality for a bootleg. It's got me looking forward to the official Fillmore DVD more, and REALLY wanting a CD of the non-album tracks they performed there.

Posted by Reggaeluv2000 - 2008/07/14 06:55

ok so I have down;oaded them. disc 2 disappeared on me. I can't watch them because on the Winrar nonsense that I won't pay for...is there any other way. I downloaded that program below and still nothing.. oh well wishful thinking..

=====

Re:Fillmore show #8 July 27th 2007 free DVD

Posted by Murder McMurderson - 2008/07/14 07:29

Winrar works fine without a license, but if you want an alternative you can use 7-Zip <http://www.7-zip.org/>. You won't be able to do anything with those files until they're extracted from the rar.

Camcorder question

Would my Sony DCR-TRV22 be good for recording? I want to do it next time if SP allows it. I would think it would be a lot better than my cyber shot:dead
